OPINION RE: LIEN PRIORITY

JEFFREY C. STONE, INC. d/b/a SUMMIT)
BUILDERS, an Arizona corporation,)
Counter-Defendant)

and related counterclaims and cross claims.)

1 The issue here is whether various mechanics' lien claimants, who claim priority
2 dating from the commencement of construction in October, 2005, have priority over a
3 construction deed of trust that was recorded in May of 2007. The lender, Mortgages, Ltd.,
4 maintains that even if there is but a single project or "work," a mechanics' lien has priority only
5 dating from the general contract for which the work was performed (the "separate contracts
6 doctrine"), and that in any event Mortgages is entitled to be equitably subrogated to a prior deed
7 of trust that was paid off and released by some of the proceeds of Mortgages' loan.

8 **BACKGROUND FACTS**

9 The construction project at issue is the remodeling or refurbishment of an existing
10 building commonly known as the Hotel Monroe. Its owner, Central and Monroe, LLC, first
11 obtained a loan from First Commonwealth Mortgage Trust in the amount of \$3.2 million,
12 secured by a deed of trust recorded in May, 2002. In July, 2005, that loan was refinanced by an
13 \$8.5 million dollar loan provided by Mortgages Ltd., secured by a deed of trust recorded that
14 same month. Almost \$3 million of the proceeds of that loan were used to satisfy the First
15 Commonwealth debt and obtain a release of the First Commonwealth deed of trust.

16 In December, 2006, the owner obtained a new loan from Choice Bank in the
17 amount of \$9.3 million. It was secured by a deed of trust recorded that same month.
18 Approximately \$7.3 million of the proceeds of the Choice loan were used to satisfy the debt to
19 Mortgages Ltd. and obtain a release of its 2005 deed of trust.

20 By the time the Choice Bank deed of trust was recorded in December, 2006,
21 however, work was already underway on the remodeling. The first general contract for this
22 remodeling project was an October 18, 2005 contract with Contractors Abatement Services, Inc.
23 ("CASI") for demolition and asbestos abatement. On October 12, 2006, the owner signed a
24 second general contract for the remodeling project, this time with KGM Builders, Inc.
25 ("KGM"), who is one of the mechanics' lien claimants asserting priority in this case. KGM then
26 entered into a subcontract for CASI to continue its asbestos abatement work. The principal of
27 KGM, Kevin Markham, was also hired by the owner to act as the owner's representative for all
28 facets of the renovation project. As early as May, 2007, the owner and Markham recognized

1 that a larger general contractor would be required once the renovation plans were finalized, and
2 had identified Jeffrey C. Stone, Inc., dba Summit Builders (“Summit”) as that general
3 contractor. Summit began work on the demolition and renovation in October, 2007, and
4 finalized its Cost Plus form of construction contract with the owner on December 12, 2007, for a
5 cost plus budgeted amount in excess of \$27.7 million. While work continued, the parties waited
6 until a permitted set of construction plans were available to sign the prime contract; the owner
7 signed on April 9, 2008 and Summit signed on April 18, 2008.

8 In the meantime, while the CASI and KGM demolition and abatement work was
9 going on, the Choice Bank debt was refinanced by another loan from Mortgages Ltd. in the
10 amount of \$75.6 million, in May, 2007. The deed of trust securing that debt was recorded on
11 May 16, 2007. From the proceeds of this second Mortgages Ltd. loan more than \$8.9 million
12 was used to satisfy the Choice Bank debt and obtain a release of its 2006 deed of trust.

13 When it made its construction loan and recorded its deed of trust, Mortgages
14 understood that it was making a “broken priority loan” because the construction work was
15 already underway. Consequently it obtained from the owner’s principals a general Indemnity
16 Agreement and Indemnification Agreement for Mechanics’ and Materialman’s Liens, and it
17 required an assignment from the owner of the owner’s rights in the general contract with
18 Summit, even though it had not yet been finalized and signed. Mortgages did not, however,
19 require or obtain any subordination agreements from any of the general or subcontractors
20 performing the work.

21 Mortgages did not have the \$75.6 million necessary to fund the loan that it made to
22 Central and Monroe. Mortgages’ business plan had been to raise the necessary funds from its
23 investors, but by May, 2007, it was already having difficulty raising as much funds as it had
24 committed to lend. When the loan closed on May 16, 2007, Mortgages paid itself in excess of
25 \$5.4 million for a “Loan Discount,” “Construction Admin. Fees,” “Rev Op Fees,” and a
26 “Processing Fee.” It agreed with the owner to a “delayed funding” arrangement, purportedly to
27 reduce the owner’s interest accrual but more likely because it did not have the funds to advance.
28 That arrangement called for about \$44.7 million to be funded to a “Construction Impound”

1 account by October, 2008, and an additional \$9.4 million for interest reserves by the month after
2 that. The initial delayed funding was funded on July 13, 2007.

3 But by November, 2007, just as the form of contract was being finalized and
4 Summit took over as general contractor, Mortgages already needed to withdraw funds that it had
5 previously paid into the Construction Impound account. Mortgages agreed with the owner to
6 “borrow” back \$2.5 million that had been funded, promising to replace \$1 million of those funds
7 on 10 days’ notice, another \$1 million on 20 days’ notice, and the full balance within 30 days of
8 the owner’s demand. Seven days after the parties agreed upon the form of the general contract
9 with Summit, and while Summit was performing work at the Project, the owner demanded the
10 first \$1 million to be repaid to the Construction Impound account. Mortgages never honored
11 that demand. Instead it not only stopped funding but diverted more money from the
12 Construction Impound account, including more than \$788,000 in April, 2008 and another half
13 million dollars in May. The owner apparently agreed to these diversions because some of that
14 money was used to fund some of the owner’s other projects. Neither KGM nor Summit was ever
15 informed of the withdrawals and diversions from the Construction Impound account or, indeed,
16 of the whole “delayed funding” scheme.

17 By the spring of 2008 the construction impound account was insufficient to pay
18 the accruing construction costs. Summit’s first two draws were paid by the owner itself because
19 there was insufficient money in the impound account. About \$1.6 million was deposited in
20 May, sufficient to pay Summit’s third draw. By June the account was empty, although
21 Mortgages had approved draws in excess of \$10 million. Mortgages’ principal Scott Coles
22 committed suicide on June 2, and Mortgages was placed into involuntary bankruptcy on June
23 23.

24 **PROCEDURAL POSTURE**

25 This litigation was originally filed in Maricopa County Superior Court and was
26 removed to this Court, pursuant to 28 U.S.C. § 1441, in connection with the pending bankruptcy
27 case of Mortgages, Ltd. Rexel Phoenix Electric and some of the other subcontractors of general
28 contractor Summit moved to remand the adversary proceeding to state court. All parties who

1 had appeared in the action agreed that the adversary proceeding should be remanded but only
2 after this Court ruled on the threshold “issue of lien priority,” and on September 10, 2009, the
3 Court entered an order to that effect.

4 After extensive discovery, pretrial motions, joint pretrial statements and trial
5 memoranda, the priority issue was tried to the Court on August 6, 7, 8, and 9, 2012. After the
6 filing of post-trial memoranda on August 20, the matter was taken under advisement.

7 **THE SEPARATE CONTRACT ISSUE**

8 Summit claims that although it had a separate contract with the owner dating from
9 December, 2007, the work it contracted to do was the same “work” or construction project that
10 CASI and KGM had begun working on as early as October, 2005 and October, 2006, prior to
11 the recordation of the second Mortgages’ deed of trust in May, 2007. Indeed, Summit even
12 entered into a subcontract with CASI for CASI to continue with the demolition and abatement
13 work that it had begun under its own general contract and continued under its first subcontract
14 with KGM. But Mortgages contends that even if it was the same “work” within the meaning of
15 Arizona’s mechanics’ lien priority statute, Arizona Revised Statutes (“A.R.S.”) § 33-992(A), a
16 mechanics’ lien cannot have a priority earlier than the general contract, so when there are
17 successive general contracts as there are here , each of them establishes a new, later priority date
18 for all of the subsequent work of both that general contractor and all its subcontractors.

19 The statutory language defining the priority of a mechanics’ lien has remained
20 virtually unchanged since it was first adopted in 1901. Currently, the statute reads, in pertinent
21 part: “The liens provided for in this article . . . are preferred to all liens, mortgages or other
22 encumbrances upon the property attaching subsequent to the time the labor was commenced . . .
23 .”¹ Mortgages contends that “the time the labor was commenced” may not be just a single date
24 but can be multiple dates if there is more than one general contract for the labor, or if some labor
25 is hired directly by the owner outside of any general contract. In its motion for partial summary
26 judgment, Mortgages argued this “separate contracts doctrine” was adopted by the Arizona
27

28 ¹ A.R.S. § 33-992(A).

1 Supreme Court in 1932 in its decision in *Wylie*,² confirmed by its 1970 decision in *Wahl*,³ and
2 then applied by the Court of Appeals in *Woodridge*,⁴ in 1981. Although the Court has already
3 analyzed that case law in denying Mortgages' motion for summary judgment,⁵ it will repeat
4 some of that same analysis here for completeness. In addition, Mortgages now contends that
5 two other cases, *Allied Contract*⁶ and *Mayer Central*,⁷ also adopt its separate contracts theory.

6 But we must begin with the statute. Prior to 1998, Arizona's statutes contained a
7 single provision governing the date of priority of mechanics' and materialman's liens, A.R.S. §
8 33-992(A). It provides that the priority date is "the time the labor was commenced or the
9 materials were commenced to be furnished." That language does not suggest that there may be
10 different dates depending on the contract under which the labor was performed. Indeed, the
11 court in *Woodridge* held that "A.R.S. § 33-992 establishes priority for *all* of the liens provided
12 for in the article on mechanics' liens."⁸ Because the priority rule hinges solely on "the time the
13 labor was commenced," the statutory language suggests there can be only one such "time," not
14 multiple times for different contracts. Of course it is entirely possible, as a factual matter, that
15 when there are multiple general contracts they may provide for different "labor," perhaps on
16 different construction projects. But when the facts are that there is but one "labor" being
17 performed, the statutory language clearly indicates there can only be one "time" that that "labor
18 was commenced," regardless of how many contracts governed the work.

19 The seminal case in Arizona is *Wylie*, where the Arizona Supreme Court held that
20 "when the building, structure, or improvement has been made under a general contract," then all
21

22 ² *Wylie v. Douglas Lumber Co.*, 8 P.2d 256, 259 (Ariz. 1932).

23 ³ *Wahl v. Sw. Sav. & Loan Ass'n*, 476 P.2d 836 (Ariz. 1970).

24 ⁴ *Woodridge Const. Co. v. First Nat. Bank of Ariz.*, 634 P.2d 13, 19-20 (Ariz. App. 1981).

25 ⁵ *Jeffrey C. Stone, Inc. dba Summit Builders v. Cent. and Monroe, LLC (In re Mortgages, Ltd.)*,
26 459 B.R. 739, 745-46 (Bankr. D. Ariz. 2011).

27 ⁶ *Allied Contract Buyers v. Lucero Contracting Co.*, 476 P.2d 521 (Ariz. App. 1970).

28 ⁷ *In re Mayer Cent. Bldg. Corp.*, 275 F. Supp. 873 (D. Ariz. 1967).

⁸ *Woodridge*, 634 P.2d at 20 (emphasis in original).

1 liens arising from work done under that contract “are upon an equal footing.”⁹ “The one who
2 furnishes the last item of material or does the last work on the building, structure, or
3 improvement is in just as good shape as the one who did the first work or furnished the first
4 material. Their right of lien relates to the same date.”¹⁰

5 There was also extensive dictum in *Wylie* indicating that labor performed under
6 separate, direct contracts with the owner would not share that same priority date, or indeed have
7 any relation back. This dictum was based on California cases decided under a statute that also
8 required construction contracts to be recorded. That recording requirement “therefore divided
9 liens into two classes, those arising under a valid contract between the owner and the contractor,
10 and those where the labor done and materials furnished were deemed to have been done and
11 furnished at the personal instance of the owner.”¹¹ Arizona’s statute does not similarly require
12 construction contracts to be recorded, and apparently never did. Therefore there is no similar
13 provision in Arizona’s statute that divides mechanics’ “liens into two classes.”

14 And the *Wylie* Court was very explicit that it was not deciding whether the same
15 priority date applies to work done under a direct contract with the owner. That opinion
16 recognized that on the facts before the court, “all of the lien claimants have become such
17 through the general contractor.”¹² Therefore the court had no occasion to determine the priority
18 rules for liens arising either under different contracts or directly with the owner: “What the rule
19 should be when the lienors have directly contracted with the owner and rendered services to him
20 personally it will be time enough to decide when the facts present the question.”¹³

21 *Wahl*¹⁴ applied the relation-back rule of *Wylie*, and in doing so quoted extensively
22 from *Wylie*’s dictum regarding a potentially different priority rule for those contracting directly

23 ⁹ *Wylie v. Douglas Lumber Co.*, 8 P.2d 256, 259 (Ariz. 1932).

24 ¹⁰ *Id.*

25 ¹¹ *Id.* at 258-59 (quoting *Simons Brick Co. v. Hetzel*, 236 P. 357, 359 (Cal App. 1925)).

26 ¹² *Wylie*, 8 P.2d at 260.

27 ¹³ *Id.*

28 ¹⁴ *Wahl v. Sw. Sav. & Loan Ass’n*, 476 P.2d 836 (Ariz. 1970).

1 with the owner. But *Wahl* similarly had no occasion to decide that issue because “In the instant
2 case the materials were furnished to the contractor, therefore, all the rights of the materialmen,
3 including Ray Lumber, relate back to a date prior to” the recording of the mortgage, the date
4 when each of the material men, with the exception of Ray Lumber, delivered materials.¹⁵

5 *Wooldridge* applied the relation-back principle to earthwork “when it has been
6 performed as a part of the work required under a general contract for the construction of a
7 building.”¹⁶ That court also emphasized that it was not deciding whether “work done under
8 subsequent independent contractual arrangements entered into directly with the owner”¹⁷ would
9 share the same priority.

10 In the absence of statutory language that “divided liens into two classes, those
11 arising under a valid contract between the owner and the contractor, and those where the labor
12 done and materials furnished were deemed to have been done and furnished at the personal
13 instance of the owner,”¹⁸ which was the basis for the California cases that gave rise to the *Wylie*
14 dictum, there is no statutory basis to give different priority dates to any liens governed by A.R.S.
15 § 33-992(A).

16 And in its post-trial memorandum, Mortgages admits that California eliminated its
17 separate contracts doctrine by amending its statutes in 1931.¹⁹ Since then, the California statute
18 specifies that the priority dates from the “commencement of the work of” improvement.²⁰

19
20
21 ¹⁵ *Id.* at 840.

22 ¹⁶ *Wooldridge Const. Co. v. First Nat. Bank of Ariz.*, 634 P.2d 13, 19-20 (Ariz. App. 1981).

23 ¹⁷ *Id.* at 20.

24 ¹⁸ *Wylie*, 8 P.2d at 259.

25 ¹⁹ *K & K Brick Co. v. Brooke*, 5 P.2d 49, 50-51 (Cal. App. 1931); Charles Evans Goulden, et
26 al., *California Mechanics’ Liens*, 51 CAL. L. REV. 331, 341 n.74 (1963) (“Prior to a change of law in
1931, the lien dated from the time the claimant did his work, if he did such work pursuant to a separate
contact as opposed to a general contract.”) (citation omitted).

27 ²⁰ The Court notes that the current version of the California Statute expressing the priority of a
28 mechanics’ lien is found at CAL. CIVIL CODE § 8450 (2012). Pursuant to the historical notes for this
statute, the section was renumbered by the 2010 additions, which became effective July 1, 2012. The
current version is a restatement of former CAL CIVIL CODE § 3134 (1969) without substantive change.

1 As noted, Mortgages now argues that two other Arizona cases adopt its “separate
2 contracts doctrine.” But neither case construes the language of A.R.S. § 33-992(A) or explains
3 how or why it requires different priority dates depending on the nature of the contractual
4 relationship with the owner. In *Allied Contract*, the lienholder claimed a priority from the
5 commencement of construction of “four duplexes on the property,” even though its work was
6 for “installation of water mains on the subject property,” which it did not begin until three
7 months later, after recordation of the mortgage.²¹ Nothing in the opinion establishes that the
8 lienholder’s work was in fact part of the same “work” or project that consisted of the
9 construction of the four duplexes. In the absence of any evidence to that effect, the court might
10 have simply assumed that it was not part of the same work because it was done pursuant to a
11 different general contract. Nothing in the opinion construes the statute or holds that it requires a
12 different priority date for commencement of the same work simply because there were multiple
13 general contracts. And the *Mayer Central* case²² is even less enlightening, because it similarly
14 fails to construe the language of the statute or provide any rationale or statement of a legal rule
15 or analysis that supports its holding.

16 If dictum were controlling, then perhaps the most definitive dictum from Arizona
17 courts on mechanics’ lien priority in the broken priority context is the Court of Appeals’
18 explanation in its extensive opinion in the *United California Bank*²³ case in 1983, *after* all of the
19 cases and dictum that Mortgages’ relies on for its “separate contracts” theory. That case was all
20 about a “broken priority” \$25 million take-out financing of the Hyatt Regency Hotel. The
21 opinion noted that it would be “a gross understatement” to describe the litigation as merely
22 “protracted and hard fought at every turn,” but also “intense” and the “work excellent.”²⁴ The
23 opinion described the basic “broken priority” problem as arising from the fact that the “owner-
24 developer[] began construction with its own funds before obtaining interim construction

25
26 ²¹ *Allied Contract Buyers v. Lucero Contracting Co.*, 476 P.2d 521, 522-23 (Ariz. App. 1970).

27 ²² *In re Mayer Cent. Bldg. Corp.*, 275 F. Supp. 873 (D. Ariz. 1967).

28 ²³ *United Cal. Bank v. The Prudential Ins. Co. of Am.*, 681 P.2d 390 (Ariz. App. 1983).

²⁴ *Id.* at 398.

1 financing. A.R.S. § 33-992 provides that mechanics' and materialmen's liens will relate back to
2 the date construction commences rather than to the time of actual filing and will, therefore, have
3 automatic priority over a subsequently recorded deed of trust."²⁵ The extremely thorough
4 opinion saw no need to describe the mechanics' lien priority that creates the broken priority
5 problem as arising only when there is only one general contract and no one does any work
6 directly for the owner. That may have been dictum because there may have been no direct
7 contracts with the owner, but even as dictum it is as authoritative as the older dictum Mortgages
8 relies on.

9 But while there is no definitive authority expressly adopting the "separate
10 contracts" theory after it was repealed by California in 1931, the Arizona Legislature
11 conclusively indicated it did not generally apply by adopting that rule only for the special
12 circumstance of site preparation work that is not governed by a general contract. The
13 mechanics' lien statute was amended in 1998 to add new paragraph E. The new provision
14 applies only to defined site preparation work and provides that when such work is not included
15 in a general contract for the construction of a building or other structure, then the site
16 improvement "is a separate work" and the mechanics' liens arising from such work have their
17 own priority.

18 All parties here agreed that the demolition, abatement and renovation of the Hotel
19 Monroe was not such site preparation and is not governed by A.R.S. § 33-992(E). But for three
20 reasons that paragraph making a special rule for separate site preparation general contracts
21 confirms that for vertical construction contracts, there is no "separate contracts doctrine."

22 First, the new paragraph specifically defines such site preparation, when not
23 included in a construction contract, to be a "separate work." If Mortgages' separate contract
24 theory were the rule, the separate general contract for the site preparation would be sufficient in
25 itself to give it its own priority. The care taken by the legislature also to define such work as a
26 "separate work" confirms that the general rule is that the nature and identity of the "work," not
27 the nature or singleness of the contract, governs priority. There would have been no reason for
28

²⁵*Id.* at 401.

1 the legislature to define such site preparation work as a “separate work” if that were not
2 otherwise determinative of priority.

3 Second, and even more importantly, there would have been no need to create a
4 special paragraph, and a special priority rule, for such site preparation work if the law had
5 always already embodied a “separate contracts doctrine.” Paragraph E only applies when the
6 site preparation is done pursuant to a contract that is separate from the general contract for the
7 construction of the building. Under Mortgage’s theory, the priority for that work would always
8 have dated from the commencement of the labor pursuant to that separate site preparation
9 contract. Paragraph E would have been entirely redundant of the general rule under paragraph
10 A. Because the Court should not assume the legislature adopted a useless law, it must conclude
11 that paragraph E adopts a special rule for some, particularly defined separate general contracts,
12 those dealings only with site preparation. Such a special rule for separate site preparation
13 contracts necessarily implies that that rule does not apply to separate vertical renovation
14 contracts such as the work on the Hotel Monroe. These are ordinary applications of the cannons
15 of statutory interpretation of *expressio unius est exclusio alterius*²⁶ and that a court should not
16 interpret a statute so as to render any portion of it redundant or meaningless surplusage.²⁷

17 Third, the new paragraph E also confirms that priority is based on the
18 commencement of the “improvement,” not on the contract under which it is performed. The
19 paragraph specifies that even for such site preparation work that is not included in a general
20 construction contract, the liens “arising from work and labor . . . for *each* improvement at the
21 site shall have a *separate* priority A lien arising from work or labor done . . . for each
22 improvement at the site attaches to the property for priority purposes at the time labor was

24 ²⁶ “Under the statutory interpretive principle of *expressio unius est exclusio alterius*, when the
25 legislature makes a requirement in one provision of the statute but does not include it in another, we
26 assume the absence of the requirement was intentional.” *Sharpe v. Arizona Health Care Cost
Containment Sys.*, 207 P.3d 742, 749 (Ariz. App. 2009) (quoting *Luchanski v. Congrove*, 971 P.2d 636,
639 (Ariz. App. 1989)).

27 ²⁷ “[W]e must avoid interpreting a statute so as to render any of its language mere ‘surplusage,’
28 but rather, must give meaning to ‘each word, phrase, clause, and sentence . . . so that no part of the
statute will be void, inert, redundant, or trivial.’ ” *Sharpe*, 207 P.3d at 749 (quoting *Herman v. City of
Tucson*, 4 P.3d 973, 979 (Ariz. App. 1999)).

1 commenced . . . pursuant to the contract between the owner and the original contractor *for that*
2 *improvement* to the site.”²⁸ In other words, paragraph E adopts the same priority rule as
3 paragraph A has always embodied, which is on a work by work or improvement by
4 improvement basis, rather than on a contract by contract basis. If the work is, factually, all the
5 same improvement, then it will all have the same priority, regardless of how many site
6 preparation general contracts govern that work.

7 This same project concept is also found elsewhere in Arizona’s mechanics’ lien
8 statutes. The Arizona Supreme Court decision in *S. K. Drywall*²⁹ dealt with the date for
9 perfecting a lien, rather than the priority date of a timely perfected lien. Liens must be filed
10 “within one hundred twenty days after the completion of a building, structure or
11 improvement.”³⁰ The issue in *S.K. Drywall* was whether six buildings constituted a single
12 project or “improvement.” The court of appeals had relied on the “contractual arrangements
13 between the parties,” and the manner of construction, to conclude that the time to perfect ran
14 from the completion of each building. The Supreme Court reversed, holding that the time runs
15 from the completion of the “improvement,” which is a “catch-all” term that refers to the subject
16 of construction.³¹ Subsequently the legislature changed that result by adding A.R.S. § 33-
17 993(B). Since 1998 that statute provides that when the work consists of separate residential
18 buildings, then “each building is a separate work” “without regard to whether the buildings are
19 constructed pursuant to separate contracts or a single contract.” But while the legislature
20 changed the specific result when multiple residential buildings are being constructed, it did so
21 by adopting the same principle that liens are governed by the nature of the “separate work,” not

22
23 ²⁸ A.R.S. § 33-992(E) (emphasis added).

24 ²⁹ *S. K. Drywall, Inc. v. Developers Fin. Group, Inc.*, 819 P.2d 931 (Ariz. 1991).

25 ³⁰ A.R.S. § 33-993(A). At the time of *S.K. Drywall*, this time period was sixty days. 819 P.2d
26 at 934. The 1998 amendments to the statute changed the time period from sixty days to one hundred
27 twenty days. The statute further provides that if a notice of completion has been recorded, the person
28 claiming the benefits of the statute must file their lien within sixty days after recordation of such notice.
A lien is filed by recording a notice and claim of lien with the county recorder and serving the notice
and claim of lien on the owner, if the owner can be found within the county.

³¹ *S.K. Drywall*, 819 P.2d at 934.

1 by the existence of “separate contracts or a single contract.” This strongly suggests the
2 legislature did not intend a different concept to govern priorities as compared to perfection
3 requirements, and to impose a distinction based on “separate contracts or a single contract” for
4 purposes of § 33-992(A) when that statute never even mentions the word “contract.”

5 There is no basis in the statute, as there was in California at the time of the *Wylie*
6 dictum, to apply different priority dates for work under different contracts with the owner. Nor
7 is there any reason to conclude that Arizona would have adopted California’s interpretation after
8 it specifically repealed that interpretation in 1932. To the contrary, the language and structure
9 of A.R.S. § 33-992(A) all imply there is a single priority date, which is the commencement of
10 “the labor,” with the sole exception under A.R.S. § 33-992(E) for liens arising under a site
11 preparation contract that is separate from a contract for the construction of a building.

12 Of course, as noted above, it is entirely possible, on the facts, that multiple general
13 contracts exist because they define different works or improvements. But now that there has
14 been a trial of those facts, and much of the evidence related to the nature of the work and
15 improvement on the Hotel Monroe, those facts conclusively establish that there was but one
16 improvement underway from October, 2005, until Mortgages ceased funding and work stopped
17 in the summer of 2008. All of the general contractors – CASI, KGM and Summit – were
18 working on the same, single renovation project. Although it significantly evolved over time,
19 there was never more than a single species – the owner did not originally set out to develop a
20 Neanderthal and only later abandon that project to create a Homo Sapiens instead. And CASI’s
21 initial asbestos abatement work was part of that same, single renovation project. The facts are
22 clear there was no need for asbestos abatement, and none would have been undertaken, except
23 because of and as part of the renovation.

24 Thus for purposes of A.R.S. § 33-992(A), the Court finds that there was only one
25 date on which “the labor” commenced, when CASI started work in October, 2005.

26 **EQUITABLE SUBROGATION**

27 Because Mortgages’ deed of trust was not recorded until May, 2007, it is junior
28 and subordinate to the mechanics’ liens whose priority date from October, 2005. To have

1 priority over those liens, Mortgages asks the Court to apply the equitable doctrine of equitable
2 subrogation, to give it the priority of the deed of trust that was paid and released by a portion of
3 Mortgages' May, 2007 loan. That was the Choice Bank deed of trust that was recorded in
4 December, 2006. But even that would not provide priority over mechanics' liens arising from
5 labor that commenced in October, 2005. So Mortgages asserts that it can also claim equitable
6 subrogation on behalf of Choice Bank, to be subrogated to the deed of trust that some of its loan
7 proceeds paid off and released, the July, 2005, deed of trust in favor of Mortgages itself.

8 The law of equitable subrogation in Arizona has changed since this Court denied a
9 motion for summary judgment in this case.³² In *Sourcecorp*,³³ the Arizona Supreme Court
10 expressly adopted the approach of the Restatement (Third) of Property: Mortgages § 7.6 (1997)
11 and rejected any requirement of an "agreement" as a condition of equitable subrogation,³⁴ as
12 some prior Arizona cases had seemed to require.³⁵ Now, under *Sourcecorp* and the Restatement,
13 "[o]ne who fully performs an obligation of another, secured by a mortgage, becomes by
14 subrogation the owner of the obligation and the mortgage to the extent necessary to prevent
15 unjust enrichment."³⁶ The Arizona Supreme Court made clear, however, that equitable
16 subrogation is available only "to the extent necessary to prevent unjust enrichment,"³⁷ and that it
17 always "depends on the facts of the particular case."³⁸ Indeed, on the facts of that case the Court
18 did not permit the full remedy of equitable subrogation, because it precluded the homeowner

³⁸ *Id.* at ¶ 29.

1 from foreclosing the now-junior priority judgment lien and instead subjected what would have
2 been the homeowner's equity in the property to satisfaction of that lien that would have been
3 eliminated by their ability to foreclose the mortgage to which they were subrogated.

4 Most of the trial was devoted to evidence as to whether it would be equitable to
5 subrogate Mortgages to the prior deeds of trust, whether Mortgages had acted equitably, and
6 whether the contractors and subcontractors would be unjustly enriched if equitable subrogation
7 were not permitted.

8 The evidence conclusively established several respects in which Mortgages did not
9 act equitably and was significantly responsible for both the financial losses and for the priority
10 conflict with the contractors. The facts also establish that Mortgages could have provided notice
11 sufficient to avoid the contractors from being taken advantage of, while at the same time the
12 facts establish there was nothing the contractors could have done to avoid the losses, the priority
13 conflict, or to give better public notice of their claimed interests. And the facts established that
14 *Mortgages* would be unjustly enriched if equitable subrogation were applied, rather than the
15 remedy being necessary for Mortgages' benefit to avoid the unjust enrichment of the
16 *contractors*.

17 First, Mortgages knew and understood that it was making a "broken priority" loan
18 in May, 2007. It then knew that "the labor" on the renovation of the Hotel Monroe had already
19 begun, so it knew that all of the contractors and subcontractors had lien rights with a priority
20 senior to the Mortgages deed of trust that was granted and recorded when the May, 2007 loan
21 was made. While it attempted to protect itself with both title insurance and indemnity
22 agreements, Mortgages did absolutely nothing to give any notice to the subcontractors that it
23 would assert a priority ahead of them, based on a theory of subrogation.

24 Mortgages' only defense of this inequitable conduct is that the Arizona courts have
25 held that the mere obtaining of insurance does not disqualify a lender from equitable
26 subrogation, and that lack of notice of potentially intervening liens is not required.³⁹ While that

27
28 ³⁹ "[T]here is no general requirement that a person seeking subrogation lack notice in order to
obtain equitable relief. . . . We also agree with the court of appeals that it would be anomalous to deny
equitable subrogation merely because a party had been diligent in obtaining title insurance." *Id.*, at

1 is correct, it does not excuse someone who actually has notice not only of the conflicting
2 lienholder's claim to priority but also that the conflicting lienholder was continuing to advance
3 additional value from failing to *give* public notice that it would seek to defeat that priority by
4 asserting equitable subrogation. In none of the cases that Mortgages relies on in defense of its
5 inaction was the conflicting lienholder continuing to advance value. It is not merely the fact that
6 Mortgages took steps to protect itself that was inequitable; it was that was in a unique position
7 to advise the subcontractors of their risk, and failed to do so. Indeed, the uncontradicted
8 testimony was that it is common for lenders in such situations to specifically request
9 subordinations from the contractors and subcontractors, which would have put them on notice of
10 the risk, and yet Mortgages did not follow this customary practice.

11 Similarly, Mortgages did not give any public notice, when it recorded its own
12 mortgage or when it released the prior Choice Bank deed of trust, that it would assert a priority
13 based on that same deed of trust that it caused to be released of public record. The Restatement
14 specifically authorizes the giving of such notice,⁴⁰ and yet Mortgages made absolutely no effort
15 to provide such notice to anyone, despite its acute awareness of the problem. Indeed, it was the
16 only party fully aware of the magnitude of the looming problem, because it was the only party
17 who understood that it did not have the funds that it committed to lend to finance the
18 construction. All other parties, and particularly the contractors, were entitled to rely on the
19 public record that reflected a \$75 million deed of trust, which everyone was entitled to assume
20 would provide sufficient funds to pay for the construction. While it is true that the evidence
21 established that neither KGM nor Summit checked that public record, there is no dispute that
22 they knew of and relied on Mortgages' financing. Indeed, when there were serious delays in
23 funding Summit's draws, Mr. Markham arranged for Scott Coles to visit the site personally,

24
25
26 1209, ¶ 24.

27 ⁴⁰ "After performing the obligation [that the owner owed to Choice Bank], the subrogee
28 [Mortgages] is entitled to receive upon request a formal written assignment of these [Choice Bank's]
rights. Such an assignment may be placed in the public records and may be helpful in ensuring that
others recognize the subrogee's [Mortgages' claimed] rights." Restatement § 7.6, cmt. a.

1 hoping to expedite Mortgages’ funding of the draws by convincing him the work was
2 proceeding apace and value being added to Mortgages’ collateral.

3 More significantly, Mortgages gave no notice when it foreclosed its deed of trust
4 that was effectively also foreclosing its belatedly-claimed rights under one or two prior deeds of
5 trust.

6 On these facts there is unique significance to the lender’s failure to give notice of
7 its claims and intentions. In most cases of equitable subrogation, all of the money that has been
8 lent is already out the door. Neither of the contending parties could have done anything to
9 mitigate their losses. Here, however, the contractors continued to incur more debt, and
10 continued to improve Mortgages’ collateral, while the public record led them to believe they had
11 priority over the Mortgages deed of trust. The contractors could have protected themselves,
12 much like Mortgages attempted to do, by requiring the owner to post a payment bond or letter of
13 credit to ensure they were paid. Or they could have insisted that the construction draw account
14 be fully funded and deposited into an escrow to which they were parties. Of course that would
15 have quickly revealed that Mortgages did not have the money to fund its promised loan, but then
16 the contractors could have ceased work and cut their losses; instead, Mortgages’ silence led
17 them on, to their detriment and to Mortgages’ advantage. “Equity aids the vigilant, not those
18 who slumber on their rights.”⁴¹

19 The Restatement, which is now the law in Arizona, specifically recognizes that this
20 kind of delay in asserting subrogation is the primary cause for courts to find that injustice would
21 result and therefore deny subrogation.⁴² And the Restatement illustrates this situation by

24 ⁴¹ *Irwin v. Pac. Am. Life Ins. Co.*, 457 P.2d 736, 741 (Ariz. App. 1969).

25 ⁴² “Since the purpose of subrogation is to prevent unjust enrichment, it will not be granted
26 where it would produce injustice. In virtually all cases in which injustice is found, it flows from a delay
27 by the payor in recording his or her new mortgage, in demanding and recording a written assignment, or
28 in otherwise publicly asserting subrogation to the mortgage paid. The delay may lead the holder of an
intervening interest to take detrimental action in the belief that that interest now has priority. . . . Even
if the payor’s mortgage is recorded immediately, prejudice to the holder of a junior interest can arise if
the payor delays in making a demand for subrogation to that holder or seeking subrogation in the
courts.” Restatement § 7.6, cmt. f.

1 reference to a mechanics' lienholder who continues construction while the payor/mortgagee
2 delays assertion of its claim to equitable subrogation.⁴³

3 But most significantly of all, the loss to the contractors was, on all the facts
4 established by the evidence, occasioned entirely by Mortgages' failure to fund the loan to which
5 it had committed. There is no reason to conclude or even assume, on the facts and evidence,
6 that the subcontractors would not have been fully paid if Mortgages had fully funded the loan to
7 which it committed. There was, for example, no evidence that the construction was turning out
8 to be more expensive than predicted, or would cost more than the loan amount to which
9 Mortgages had committed. Consequently on these facts the court must conclude that the
10 subcontractors would have been fully paid if Mortgages had fully funded its loan. Denying
11 equitable subrogation would permit the subcontractors to recover some, but not all, that they are
12 owed. They will still suffer substantial losses. But they certainly will not be enriched, unjustly
13 or otherwise, compared to what they would and should have been paid if Mortgages had not
14 breached its loan commitment and withdrawn funds from the construction loan account. They
15 would only be paid what they were owed, but not enriched.

16 Mortgages has cited no case, and the Court has not located any authority, that
17 would extend equitable subrogation to a breaching lender, and certainly not to a lender whose
18 promised but unfulfilled loan was instrumental in inducing the investment of labor and materials
19 by the party with the superior record lien.

20 Moreover, the facts are undisputed that Mortgages' benefitted itself at the expense
21 of the contractors. First, it paid itself more than \$5.4 million from the initial loan funding, when
22 it was already on notice that it would likely not be able to raise all the money it had committed
23 to lend. Then it "borrowed" back \$2.5 million of the funds it had already advanced (and did so
24 without any notice to the contractors), and then failed to refund those amounts on demand as it
25 had committed to do. And as the well was running completely dry, it took another \$1.3 million
26 from the account in the last two months, when it knew it could not fund as much as a tenth of

27
28 ⁴³ *Id.*, Illustration 30. The notes specifically indicate that Illustration 30 is based in part on the
Arizona case of *Peterman-Donnelly Engr's & Contractors Corp. v. First Nat'l Bank of Ariz.*, 408 P.2d
841 (Ariz. App. 1965).

1 the draws that it had approved. Mortgages has already been unjustly enriched by more than \$9
2 million it received from a loan that it did not fully perform. Mortgages only response to that
3 analysis is to note that the contractors had no direct contract with Mortgages. But the whole
4 purpose of the law of unjust enrichment is to provide a just remedy when there is no contract, so
5 it is no defense to an unjust enrichment analysis to argue there was no direct contractual
6 obligations. And in any event it is Mortgages' burden to prove that the court must grant it an
7 equitable remedy that is necessary to avoid unjust enrichment of the contractors, which
8 Mortgages can hardly do when it has already been unjustly enriched at the expense of the
9 contractors.

10 Mortgages also attempts to defend against this analysis by arguing that its
11 investors – those who advanced money to fund the small portion of the loan that was funded,
12 most of which came back to Mortgages' pockets – had no obligation to the contractors, or
13 indeed to anyone, to fund the balance. While that may be true, it is entirely irrelevant.
14 Mortgages' investors can claim no greater rights than Mortgages,⁴⁴ so if Mortgages cannot carry
15 its burden of proving that equitable subrogation is necessary to prevent the unjust enrichment of
16 the contractors, neither can its investors.

17 CONCLUSION

18 On these facts, equitable subrogation is not necessary to prevent unjust enrichment
19 of the contractors and subcontractors. To the contrary, even without equitable subrogation, the
20 contractors will be paid far less than they are justly entitled to receive for their work, and it is
21 entirely just and proper that Mortgages should bear a substantial portion of their loss, for which
22 it is largely responsible in at least an equitable sense. The contractors and subcontractors are
23 therefore entitled to a lien priority dating from October, 2005, and Mortgages is entitled only to
24 the priority dating from the recordation of its deed of trust on May 16, 2007.

Because that concludes the lien priority dispute, this adversary proceeding is remanded to Maricopa County Superior Court pursuant to this Court's order of September 10, 2009.

DATED AND SIGNED ABOVE
